TECHNICAL SKILLS

Languages: Python, JavaScript, C++, SQL, Bash
Backend: Django, Django REST Framework (DRF), FastAPI, Flask, REST APIs, JWT Authentication
AI & LLM: LangChain, LangGraph, RAG Pipelines, OpenAI APIs, Vector Databases, Prompt Engineering, Ollama
Architecture & Messaging: Microservices, Distributed Systems, Celery, RabbitMQ, Redis
Cloud & DevOps: AWS (Lambda, API Gateway, EventBridge, DynamoDB, S3), Docker, Git
Databases: PostgreSQL, MySQL, MongoDB

WORK EXPERIENCE

Welldone Healthcare Pvt. Ltd. | *Software Development Engineer Intern* Nov 2026 – Present

- Built and shipped backend features for a live production application using **Python**, **Django**, and **DRF**, with secure **REST APIs**, **JWT authentication**, and optimized **PostgreSQL** schemas (indexing, ORM tuning).
- Implemented **Redis** caching and **Celery** background workers to speed up API responses; containerized with **Docker** and added unit tests through Git-based code reviews.

Brain of Code | *Software Development Intern* Apr 2026 – Sep 2026

- Developed scalable backend modules using **Django** and **DRF**; added **Redis** caching that reduced response times by **40%** on high-traffic endpoints.
- Resolved **10+** critical bugs and optimized **PostgreSQL** queries, cutting execution time by **20–25%**.

Smart India Hackathon (SIH) Mar 2025 – May 2025

- Led a **5-member team** to the final round, building an internship portal (**Flutter**, **Flask**, **MySQL**) with REST APIs and JWT authentication that connects **1000+ students** with **500+ companies**.

KEY PROJECTS

AI-Powered Personal Mental Health Assistant Live Demo

- Designed a self-hosted multimodal system (text, voice, video) that detects **28 emotions** with **90–94% accuracy** using **RAG**, **LangChain**, and a fine-tuned local **LLM (Ollama)**; served via **Flask REST APIs** with real-time crisis detection and validated by **50+ test users**.

Hospital Management System GitHub

- Built a **Python** desktop application with role-based login and **5+ modules** (patients, appointments, billing) on **MySQL** with optimized SQL queries and **Bash** scripts for setup and backups.

OPEN SOURCE CONTRIBUTIONS

Microsoft AI-For-Beginners | *Python Contributor* GitHub

- Strengthened error handling in image validation functions by replacing unsafe bare `except` clauses per **PEP 8** (repository has **58k+ GitHub stars**).

ai-hub | *Python Contributor* GitHub

- Implemented a **Claude CLI Provider** module by extending the **CLIBridge** architecture with zero core-code changes across **5 files (+221/-4 lines)**, addressing **5 maintainer review rounds** before merge.

Django-CRM | *Python/Django Contributor* GitHub

- Fixed a data integrity bug in Lead-to-Request conversion, verified against the project's **194-test suite**.

13+ open-source contributions across various repositories, with 12 pull requests merged.

EDUCATION

Babasaheb Bhimrao Ambedkar University *2024–2026*
Master of Computer Applications (MCA) – Computer Science

CERTIFICATIONS & ACHIEVEMENTS

- Competitive Programming: Solved 1000+ Data Structures and Algorithms problems on LeetCode.
- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional
- Microsoft Certified: Data Analyst 101
- Deloitte Cybersecurity Job Simulation
