TECHNICAL SKILLS

Languages: Python, REST APIs, JavaScript, C++, SQL, Bash

AI & LLM: LangGraph, LangChain, RAG Pipelines, OpenAI APIs, Vector Databases, Prompt Engineering

Backend Frameworks: Django, FastAPI, Django REST Framework (DRF)

Architecture & Messaging: Distributed Systems, Microservices, RabbitMQ, Celery, Redis

Cloud & DevOps: AWS (Lambda, API Gateway, EventBridge, DynamoDB, S3), Docker

Databases: PostgreSQL, MySQL, MongoDB

WORK EXPERIENCE

Brain of Code — *Software Development Intern*

Oct 2025 – Apr 2026

- Built and maintained backend modules using **Django & DRF**, developing **REST APIs** and integrating **Redis** caching to improve response times for high-traffic endpoints.
- Fixed critical bugs and optimized existing **PostgreSQL** queries, improving overall system stability and performance.

Smart India Hackathon (SIH) — *Backend Developer*

Aug – Sep 2025

- Built a cross-platform internship application (**Flutter + Flask**) with **MySQL** schemas, **REST APIs**, and **JWT authentication**, connecting **1000+** students with **500+** companies.

OPEN SOURCE CONTRIBUTIONS

Microsoft AI-For-Beginners Python Contributor

[GitHub](#)

- Contributed a **bug fix** to Microsoft's AI-For-Beginners (**58k+ GitHub stars**) by replacing bare **except** clauses with **except Exception** in image validation functions, improving error handling and adhering to **PEP 8** standards.

AI-hub Python Contributor

[GitHub](#)

- Built **Claude CLI Provider integration** with **zero core-file changes**, documented via **ADR** (*Python, pytest*).

Django-CRM Python/Django Contributor

[GitHub](#)

- Fixed **data integrity bug** in Lead-to-Request conversion, verified against **194-test suite** (*Python, Django ORM*).

KEY PROJECTS

AI-Powered Personal Mental Health Assistant

[Live Demo](#)

- Built a **self-hosted multimodal system** accepting **text, voice, and video** as input, trained on **1L+ data samples** to detect **28 emotions** at **90–94% accuracy**, using **Python**, a **RAG pipeline** with **Vector Databases**, and **LangChain** to ground and orchestrate context-aware responses.
- Integrated a local **LLM via Ollama** with **prompt engineering** for empathetic replies, exposed through **REST APIs** built with **Flask** to power real-time **crisis detection** and a live wellness dashboard.

Hospital Management System

[GitHub](#)

- Built a **desktop application** in **Python** with **role-based login** for 3 user roles, managing **5+ modules** (patient records, appointments, billing) using a **MySQL** database with optimized **SQL** queries, and **Bash** scripts to automate setup and backups.

EDUCATION

Babasaheb Bhimrao Ambedkar University

2024 – 2026

Master of Computer Applications (**MCA**) – Computer Science

Focus: Advanced Algorithms, Cloud Computing, Artificial Intelligence

PUBLICATIONS & ACHIEVEMENTS

- **Technical Writing:** Published articles for **DigitalOcean** and **Earthly**, amassing **10,000+** total reads on topics including Kubernetes Autoscaling, Docker, and Python Unicode.
- **Honorable Mention:** Recognized in the **Microsoft Pygame Hackathon** for innovative game logic and design.
- **Competitive Programming:** Solved **200+ Data Structures and Algorithms problems** on LeetCode.
- **Certifications :** Oracle – Cloud Infrastructure 2025 Certified Generative **AI Professional**
Microsoft – **Data Analyst** 101 Certified
Deloitte – **Cybersecurity** Job Simulation
