surajkr2662003@gmail.com — [LinkedIn](#) — [GitHub](#) — [Portfolio](#) — +91 7061244109

TECHNICAL SKILLS

Languages: Python, REST APIs, Git, JavaScript, C++, SQL, Bash

AI & LLM: LangGraph, LangChain, RAG Pipelines, OpenAI APIs, Vector Databases, Prompt Engineering

Backend Frameworks: Django, FastAPI, Django REST Framework (DRF)

Architecture & Messaging: Distributed Systems, Microservices, RabbitMQ, Celery, Redis

Cloud & DevOps: AWS (Lambda, API Gateway, EventBridge, DynamoDB, S3), Docker

Databases: PostgreSQL, MySQL, MongoDB

WORK EXPERIENCE

Smart India Hackathon (SIH) 2025

Nov 2025 – Dec 2025

Team Leader & Full-Stack Developer

Remote

- Led a team of 5 through **3 rigorous rounds**, delivering a **Flutter + Flask internship marketplace app** with REST API, MySQL schemas, role-based JWT authentication, and real-time search — designed to connect **1000+ students** with **500+ companies**.

Samsung Innovation Campus

2025

AI Developer — University Project

On-site

- Built an **AI-powered facial recognition system** that accepts a person's image and automatically retrieves data from **3+ social platforms** with **100% accuracy** via an end-to-end pipeline

Projects & Development Work

2024 – Present

Web, Mobile & AI/ML Projects

- Independently built **10+ projects** across web, mobile, and AI/ML domains using **Flutter, Python, Django, Flask, REST API, React, and MySQL**, solving real-world problems through end-to-end development.

KEY PROJECTS

AI-Powered Personal Mental Health Assistant

[Live Demo](#)

- Built and deployed a fully **self-hosted, no third-party API dependencies** multimodal system (**frontend on Vercel, backend/model on Hugging Face Spaces**) accepting **text, voice, and video** inputs, detecting **28 emotions** with **90–94% accuracy** by training on **1 lakh+ data samples** using fine-tuned emotion classification models.
- Architected and deployed a **Flask backend on Hugging Face Spaces** with **Ollama LLM** integration for real-time **crisis detection**, sentiment analysis, chat history, interactive **dashboard**, and **wellness features** — accessible via a live web application.

Hospital Management System

[GitHub](#)

- Built a **desktop application** with **role-based login** for admins, doctors, and staff, managing **5+ modules**, supporting **3 user roles**, and **MySQL** database integration.

Inventory Management System

[GitHub](#)

- Developed a **full-stack inventory system** with real-time **stock tracking**, automated **low-stock alerts**, product and supplier management, and **sales reporting** dashboard powered by a structured **MySQL** database.

EDUCATION

Babasaheb Bhimrao Ambedkar University

2024 – 2026

Master of Computer Applications (MCA) – Computer Science

Focus: Advanced Algorithms, Cloud Computing, Artificial Intelligence

PUBLICATIONS & ACHIEVEMENTS

- Technical Writing:** Published articles for **DigitalOcean** and **Earthly**, amassing **10,000+** total reads on topics including Kubernetes Autoscaling, Docker, and Python Unicode.
- Honorable Mention:** Recognized in the **Microsoft Pygame Hackathon** for innovative game logic and design.
- Competitive Programming:** Solved **50+ Data Structures and Algorithms** problems on LeetCode.
- Certifications :** Oracle – Cloud Infrastructure 2025 Certified Generative **AI Professional**
Microsoft – **Data Analyst** 101 Certified
Deloitte – **Cybersecurity** Job Simulation
